WORK EXPERIENCE

Programmer — PT. Logika Sistem Bisnis | August 2026 – Present | Sukoharjo, Indonesia

- Build frontend interfaces with Next.js, React, and Tailwind CSS.
- Develop backend RESTful APIs with PostgreSQL databases.
- Extend Epicor ERP with server-side C# functions, Business Process Management (BPM) workflows, and Business Activity Queries (BAQ).
- Build custom enterprise screens in Epicor Application Studio to streamline business processes.
- Administer servers over SSH (PuTTY): configure Nginx/Apache virtual hosts, manage Git deployments, monitor logs, and troubleshoot production issues.

Programmer — PT Teknologi Translasi Utama | July 2025 – January 2026 | Indonesia

- Built and deployed responsive web applications, covering the full development lifecycle through production deployment.
- Worked in an agile team: integrated RESTful APIs, performed functional testing and debugging, and optimized performance.

Freelance Web Developer — Self-Employed | June 2024 – Present | Remote

- Delivered custom web platforms for commercial clients, from technical discovery and architecture design through API integration, deployment, and maintenance.
- Built full-stack applications including a laundry management system (Laravel, MySQL) and corporate landing pages.
