Competition

Paundra Yudha Dharmawan

System Information Student | IT Enthusiast
Sukoharjo, Jawa Tengah, Indonesia

Ringkasan

Information Systems student at Universitas Tiga Serangkai with a Software Engineering background from SMKN 6 Surakarta. I've been building software since 2021, focusing on creating functional, responsive, and pixel-perfect web and mobile applications. My experience includes frontend development with Next.js, React Native, HTML, CSS, and JavaScript, mobile development with Kotlin, and backend development using Laravel, Express.js, and Python. I'm also familiar with Firebase, Git, and modern development workflows. I enjoy working both independently and in teams, and I'm always eager to learn new technologies while building impactful digital products.
